## Roxset WS Wall Protection System

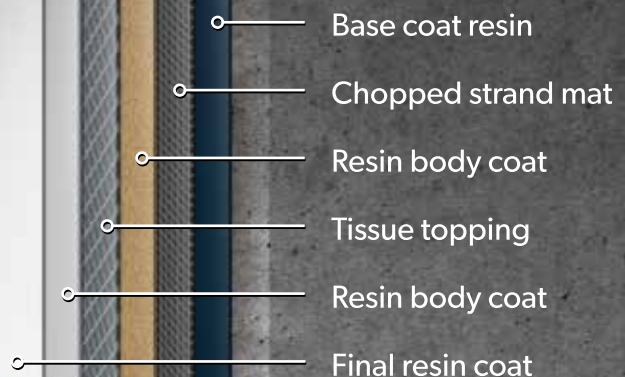

### Heavy Duty Wall Finishes

**Roxset WS** - The right choice  
for the highest level of hygiene.

Roxset WS is a seamless, impervious  
and durable wall surface that has been  
specifically developed for walls in work  
areas that require the highest level of  
hygiene and protection.

Ideally suited to the food preparation  
industries including; abattoirs, bakeries,  
breweries, pharmaceutical manufacturers,  
small goods and wineries.

The easy maintenance regime and exceptional  
strength of **Roxset WS** make it a wise and  
economical choice when upgrading your  
production facility.

FOOD STANDARDS

# Roxset WS Wall Protection System

Roxset WS is manufactured in situ, it is a compound of special epoxy resins, chopped strand mat, tissue and additives rolled onto walls.

## CHEMICAL RESISTANCE

|                          |                         |
|--------------------------|-------------------------|
| Petrol                   | Diesel Fuel             |
| Toluene                  | Carbon Tetrachloride    |
| Glycerine                | Hydrochloric Acid - 31% |
| Tartanic Acid 5%         | Styrene Monomer         |
| Sulphuric Acid - 70%     | Lactic Acid - 5%        |
| Sodium Bi-sulphate - 10% | Phosphoric Acid - 57%   |
| Linseed Fatty Acid       | Sodium Carbonate 10%    |
| Methylated Spirits       | Power Kerosene          |
| Crude Oil                | MIBK                    |
| Acetic Acid - 1%         | Citric Acid 5%          |
| Detergent - 100%         |                         |

## TECHNICAL DATA - Specifications

|              |                                                               |
|--------------|---------------------------------------------------------------|
| Type:        | Rolled on with chopped strand mat, tissue and colour overcoat |
| Thickness:   | 1.5mm (approx.)                                               |
| Colour:      | Generally, off white                                          |
| Resin Grade: | Food Grade BSI ISO 9001:2015                                  |

 **EASY TO CLEAN / LOW MAINTENANCE** – Roxset WS Wall coatings stay in optimum condition to provide you with years of durability.

 **HIGH / LOW TEMPERATURE TOLERANT** – Roxset WS Wall coating is both high & low temperature tolerant, ideal for wet & dry areas.

 **WATERPROOF & SEAMLESS** – Environmental protection law dictates that floor coatings have to provide an impermeable seal.

 **LOW VOC / ODOUR** – The complete range of Roxset coatings are classified as VOC Free with a neutral odour.

 **HYGIENE BIOMASTER** – Biomaster offers continuous protection in areas, where hygiene & safety is of the utmost importance.

 **CHEMICAL RESISTANCE** – Roxset's WS Wall epoxy coating system is durable and seamless with a high level of chemical resistance to a range of fuels and acids.

 **DURABLE / LONG LASTING** – Roxset Coating Systems are highly durable, making it ideal for commercial food facilities and production areas.

 **COATING FINISHES & COLOURS** – Generally "Off White"

Roxset is a food grade coating system compliant with TGA, HACCP, BRC, AQIS & FSANZ. It provides an attractive, resilient and robust surface with an impervious finish.
